

# Your partner in dairy automation

From software and hardware supply to installation and ongoing support, Easy Dairy can help you create a complete dairy automation solution.

## We supply

- Easy Dairy Herd Management Software
- Easy ID Rotary & Herringbone Identification
- Easy Draft Automatic Sorting
- Easy Feed Herringbone Feeding
- Saber Fat, Protein and Milk Meters
- Saber Cell Count Meters
- Full integration with Automatic Heat Detection & Automatic Cup Removers
- And much more...

EXCEPTIONAL SERVICE,  
24/7 SUPPORT

PROUDLY  
AUSTRALIAN OWNED

TRUSTED ON OVER  
2,000 AUSSIE FARMS

# Easy Dairy

We're best known for our herd management software, with over 2,000 Australian farms trusting Easy Dairy for its reliability and our renowned customer support.

Simple dashboards, fast event entry and easy reporting make it a pleasure to use.

You'll get:

- Live management and attention lists such as In Milk, Dry, Fertility Problem Cows and Preg Test Due;
- Yearly planner view of calvings and dry off due each day;
- Automatic handling of milk quality paperwork;
- Links to all Australian Herd Recording Centres for transfer of data over the internet.

Plus much more. You can even download a free trial at [www.easydairy.com.au](http://www.easydairy.com.au).

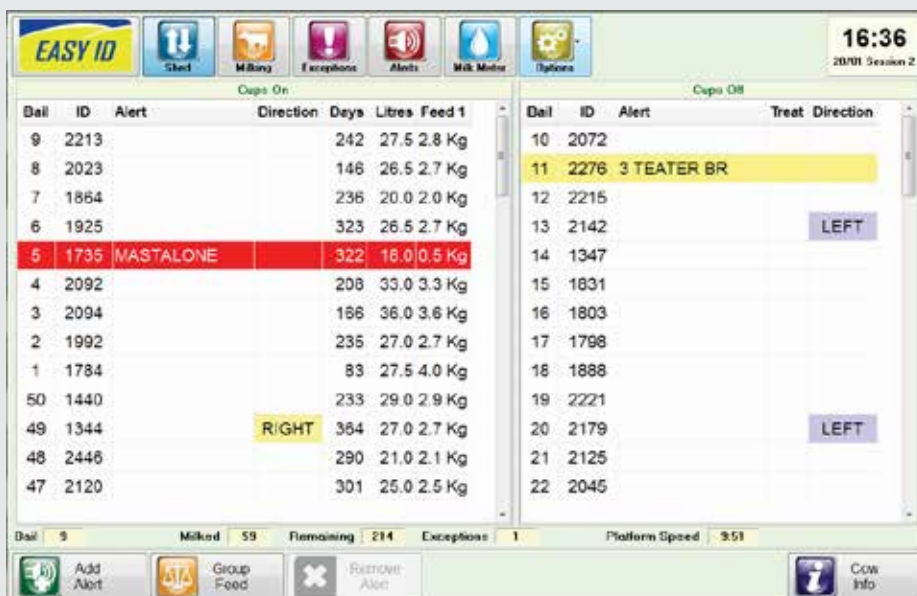

# Easy ID

Rotary and Herringbone identification, feeding, alerting and so much more.

Proudly Australian made for Australian farmers, Easy ID is used on more farms in Australia than all other automation systems combined.

Built on the foundation of Easy Dairy, with innovative features like touchscreen computers within arm's reach of the operator and state of the art electronics backed by 24/7 support. Reliability, ease of use and unparalleled support ensure your peace of mind.

Cows are identified using their NLIS tag as they enter the dairy and operators are notified of any action required by customisable spoken alerts.

The screenshot shows the Easy ID software interface. At the top, there are icons for Shed, Milking, Exceptions, Alerts, Milk Meter, and Options. The main display is divided into two columns of cow data. The left column lists cows with their IDs, alerts, and feeding directions. The right column lists cows with their IDs, alerts, and treatment directions. A status bar at the bottom shows 'Bail: 5', 'Milked: 59', 'Remaining: 214', 'Exceptions: 1', and 'Platform Speed: 9.51'. There are also buttons for 'Add Alert', 'Group Feed', 'Exception Alert', and 'Cow Info'.

Bail	ID	Alert	Direction	Days	Litres	Feed 1
9	2213			242	27.5	2.8 Kg
8	2023			146	26.5	2.7 Kg

19	2221			
20	2179			LEFT
21	2125			
22	2045			

Animals are individually fed, ensuring health problems are avoided and production is maximised.

Easy ID integrates seamlessly with most other automation equipment available including milk meters and automatic heat detection systems, so you can install your preferred hardware.

## Easy Draft

---

Refined over many years, our robust Easy Draft gate is made with quality Australian steel and is reliable, easy to use and gentle on animals. It's quiet, doesn't interrupt cow flow and catches all (and only) the cows you want.

## Easy Feed

---

Individual feeding increases production by over 10% in most cases, achieved by redistributing feed to fresh or higher producing cows. However until now, Herringbone feed systems have been expensive and cumbersome to install. Our revolutionary system allows feeding in herringbone dairies at a fraction of the cost of other systems. We use the latest technologies to manage each motor individually, increase reliability and reduce installation costs.

## Saber Fat, Protein & Milk Meters

---

The Saber Milk analysis sensor is a simple and powerful way to gather precise production information for individual cows, providing live results for yield, fat, protein, lactose and conductivity. With Saber Milk, you can identify your real performers with accurate live information, optimise your feed efficiency by feeding your top performers more and increase production and profitability.

## Saber Somatic Cell Count Sensor

---

Get instant somatic cell count (SCC) results when you install Saber SCC Sensors. Reduce SCC levels in your herd, improve bulk SCC management, increase profitability and reduce running costs.

No more waiting for herd test results!

## What our customers say about Easy Dairy

---

*"In the past we have used three other packages. Reliability, ease of use and support was a big issue. We were so impressed with Easy Dairy that we changed again. My advice to other farmers would be use Easy Dairy, **it is the best program around.**"*

*- Chris Slaughter*

*"Easy Dairy is **by far the best I've encountered.**"*

*- Travis Gilmore*

*"Having used another herd management program we were used to doing things the hard way. But now that we are using Easy Dairy the answers are always provided quickly and in an easy to read format. **The support is great;** if I do have a question I can call the support team, they are always patient and they don't make me feel silly."*

*- Kellie Beverley*
